Building 945
Rickenbacker, Ohio 42317-5933
phone: 614.336.6505 fax: 614.336.6475

Technical Rider

Listed below are the minimum requirements the 122nd Army Band Concert Band needs to perform:

- 1. Stage/performing area dimensions:** The band requires a minimum performing area of 60-feet by 40-feet. The stage/performing area should be clear of all obstructions and cleaned prior to the arrival of the band.
- 2. Chairs:** If chairs are readily available at your performance site, the band will utilize them. The band can provide its own chairs if needed.
- 3. Sound shell:** In most circumstances, the band will use a permanent shell if available. If the performance area allows, the band owns an inflatable sound shell that can be erected on site.
- 4. PA system:** The band will use its own PA system. The band's setup crew will begin setting up approximately three hours prior to performance time.
- 5. Electrical requirements:** Electrical requirements for audio and stage are 110 volts single stage with a minimum of 40 amps derived from two separate circuits.
- 6. Lighting:** Lighting in the performance should be sufficient for reading newspaper-sized print without difficulty.
- 7. Equipment storage, warm-up areas and restrooms:** Lockable changing facilities are required for approximately 60 males and 15 females. If possible, mirrors, clothing racks/hooks and chairs should be provided but are not required. An area out of earshot of the stage should be provided for performers to warm up prior to concert time. Additionally, restrooms for men and women should be provided.
- 8. Truck access:** The band set up crew needs access to the stage/performing area for its 25-foot box truck. The truck can utilize a loading dock if one is available.
- 9. Parking:** Parking is required for two large equipment trucks, one bus and two 15-passenger vans.

The band remains flexible depending on specific arrangements. Please contact us at 614.336.6505 if you have any questions or concerns.
